

New Horizons in Drug Delivery and Formulation 2023

November 27-29, Uppsala

About

Join industrial and academic representatives for the latest research progress within drug delivery and formulation!

Sessions

Virtual drug delivery – Prof. Thomas Schön, Uppsala University

Advanced analytics and characterization methods – Prof. Ben Boyd, University of Copenhagen

Drug delivery and formulation – Prof. Jean Christophe Leroux, ETH Zurich

Delivery of biologics – Prof. Hanne Mørck Nielsen, University of Copenhagen

The John Sjögren seminar

With Prof Clare Strachan, Helsinki University. In honor of his industrial and scientific accomplishment this session focuses on current advances and related future challenges within drug development.

What is SweDeliver?

A research forum in drug delivery, focusing on new strategies for parenteral, oral and pulmonary delivery with 17 industrial and academic partners.

What is NextBioForm?

A competence center for formulation and processing of biological modalities with 20 industrial and academic partners.

What is NORDIC POP?

A Nordic university consortium targeting the next generation patient-oriented pharmaceutical products with 10 partners from the Nordic and 5 from the Baltic area.
